

# Curriculum Prospectus 2024

WA COLLEGE *of* AGRICULTURE - HARVEY  
*An Independent Public School*

## PURPOSE

Our purpose is to provide education and training in an agriculture and related trades context, to enable our students to obtain high school graduation, the Western Australian Certificate of Education, and a variety of nationally recognised certificates. The aim is to provide the means for students to make a successful transition into work, apprenticeships or further study on graduating from the College.

We:

- Deliver education and training that integrates learning from a commercial farm, industrial style trade workshops and classroom settings.
- Simulate a realistic work environment through employing commercial practice on farm, working a longer day and shift work at times, insisting on professional standards of uniform and safety, fostering an entrepreneurial spirit and customer service, which all contribute to the development of work ethic.
- Develop independent living skills, promote accepted Australian values through collaborative and peer mediation skills obtained in a boarding setting, fostering team spirit through work and physical recreation both within the community, between groups on the campus, and between schools.
- Facilitate students obtaining experience on the job in their industry area through work experience.
- Collaborate with industry and the wider community to support student learning and development.

This Curriculum Prospectus provides a range of information on the pathways, courses and certificates on offer at the College and the processes utilised in their delivery, assessment, reporting and management.

I look forward to working with you and your child and a positive and productive association with the College.

Stephen Watt  
Principal

## CODE OF PRACTICE

The Western Australian College of Agriculture – Harvey will ensure that policies and management practices are adopted which maintain high professional standards in the delivery of education and training services, and which safeguard the educational interests and welfare of all students.

1. ***Delivery and Assessment of Education and Training Services***  
The Western Australian College of Agriculture – Harvey will ensure that appropriately qualified staff and adequate resources are available and utilised in the provision of education and training services.
2. ***Marketing of Education and Training Services***  
The Western Australian College of Agriculture – Harvey will market its education and training services with integrity, accuracy and professionalism. In the provision of information, no false or misleading comparisons will be drawn with any other provider or course. As a Registered Training Organisation (50421), recognition will be accorded other Registered Training Organisations certifying achievement through the Training Accreditation Council.
3. ***Student Recruitment and access to services***  
The Western Australian College of Agriculture – Harvey will ensure that the recruitment of students is conducted at all times in an ethical and responsible manner and that selection decisions are fair and comply with equal opportunity legislation.
4. ***Student Information***  
The Western Australian College of Agriculture – Harvey will provide accurate and current information to students and prospective customers on all relevant matters. This will include course outcomes and assessment procedures, staff and facilities, fees charges and refund entitlements, admission criteria and procedures, termination of tuition and student withdrawal arrangement, internal and external grievance procedures and student welfare and support services.
5. ***Financial Management***  
The Western Australian College of Agriculture – Harvey will ensure that all financial procedures comply with the Financial Administration and Audit Act and that a fair and equitable policy is applied for the refund of student fees and charges.
6. ***Certification***  
The Western Australian College of Agriculture – Harvey will provide accurate and current information to students and prospective customers concerning course outcomes and competencies to be achieved, assessment procedures including the recognition of prior learning and the certification arrangements on completion and partial completion of the course. Certifications will be issued within 30 days of the learner being assessed as meeting the requirements of the training product.
7. The Western Australian College of Agriculture – Harvey is responsible for the quality of training and assessment in compliance with the Standards for Registered Training Organisations (RTO's) 2015 and the issuance of the AQF Certification Documentation.
8. ***Compliance with Relevant Legislation***  
The Western Australian College of Agriculture – Harvey in its delivery of education and training services complies with the following legislation:
  - School Education Act 1999 – as a government school the college operates under Department of Education WA and all its relevant policies and procedures. These documents are available on the Department's Intranet under 'Our Policies'.
  - Vocational Education and Training Act 1996 and the Vocational Education and Training (General Regulations) 2009 – as an RTO School under the Act the College requires approval from the Education Minister to provide a course or program and is to comply with directions as given by the minister in regards to fees, accounts to be kept and reporting requirements.

- Occupational Health and Safety Act 1984 – the College provides a safe training and working environment using the Department of Education policies and guidelines. To assist the College has an OH&S Committee with OSH Representatives from all sections of operations.
- Anti – discrimination legislation and regulations (Disability Discrimination, Human rights and Equal Opportunities, Racial discrimination, Sex Discrimination) – the college provides equal opportunity for all staff and students and ensures no staff member or student is disadvantaged, using the Department of Education policies and guidelines.
- Consumer protection requirements – sufficient information is supplied to students upon enrolment and entry to the College.
- Working With Children Act – all staff and volunteers who work at the college are required to have a current WWCC.
- Copy Right Act – the college ensures that it will comply with this act in the reproduction and provision of materials to staff and students
- Privacy Act – the College will ensure the details and records of students and staff are managed in accordance with the Act using the Department of Education policies and guidelines.

As a Registered Training Organisation the Western Australian College of Agriculture - Harvey cooperates with the Training Accreditation Council (TAC), its regulatory body, in the normal course of business and maintains compliance with the standards.

## DESCRIPTION OF THE SCHOOL

### **A BRIEF HISTORY:**

In 1953 the disused Second World War army training and internment facility was repurposed for housing students who wished to pursue an education centred around farming. It was administered by Harvey Junior High School and later the Harvey Agricultural Senior High School.

Initially, students were transported to local farms for the practical component of their courses, but gradually land around the site was purchased and a school farm established.

The campus only housed male students until 1988 when the first 2 females attended, boarding in the town. In 1992, a dormitory for girls was opened with 4 girls in attendance, and the campus has provided accommodation for both sexes ever since.

On the 19th January 1998, the Harvey Agricultural College officially came into being separating from its High School. In 1999, the building of the Harvey dam resulted in most of the land surrounding the Harvey site being sold, resulting in an agreement to purchase the Wokalup Research Station from the Department of Agriculture for use by the College.

In 2000, the Western Australian College of Agriculture was formed and Harvey joined four other Colleges in a consortium of schools with a similar ethos, purpose and operation.

In 2004, 3 Year 13 students were enrolled and in 2005, a trial group of Year 10 students made it the most diverse of all Ag Colleges that make up the Western Australian College of Agriculture. The trial was continued and expanded in 2006, laying the foundation for a 3-year course.

In 2009 confirmation was received that the College would be rebuilt on the Wokalup farm site. This news was widely welcomed by the school community as a way of consolidating all college operations on one site with new buildings. The trade centres were fully commissioned term two, 2012 and the rest of the campus operational for the 2013 academic year. The use of the original James Stirling Place site continues to be managed by Department of Education WA in consultation with the WA College of Agriculture – Harvey.

In 2013 the College secured Independent Public School Status which enabled a degree of self-determination.

The College has grown to around 170 students with applications for places vastly exceeding capacity of the residence and learning program. The College continues to provide valued pathways into employment, apprenticeships and further study and graduates find success across a wide range of industry areas.

### **THE STUDENTS:**

WA College of Agriculture Harvey draws students who have successfully completed Year 9 or 10 from a wide range but predominantly the South-West land division from a range of backgrounds with a common interest in agriculture and related trades.

The College caters for around 170 students for year 10, 11 and 12 of which 126 students board and the remainder attend as day students. Approximately 40% of the population is female.

Most graduates enter the workforce on completion of their course, others continue training at either TAFE or University. Unemployment is virtually nil.

### **THE STAFF:**

Over 75 staff are employed at the College which operates 24 hours per day 365 days of the year.

Residential Supervisors are employed day and night to provide pastoral care and the necessary services for boarding students. These are complemented on site by Catering, Cleaning and Laundry staff all dedicated to make the College a home away from home for the students.

Qualified staff with extensive experience are employed to deliver education and training to students across the range of curriculum and training areas. Quality staff are employed in the administrative and clerical divisions.

A Chaplain, Nurse and School Psychologist make up part of the Student Services Team.

## **INDUSTRY SUPPORT**

The College receives significant industry support for developing and maintaining farm and trades training policy, facilities and processes, and in reviewing course offering.

### **Industry supporter includes**

- Department of Primary Industries and Regional Development
- Herd Improvement Service of WA (FARMWEST)
- Department of Parks and Wildlife
- Department of Fire and Emergency Services (DFES)
- Harvey Fresh & Harvey River Estate
- Worksafe WA
- Alcoa
- Agricultural Educators Association of WA & Australia
- Shire of Harvey
- Holstein Friesian Classifiers
- Royal Agricultural Society
- Forest Products Commission
- School Curriculum and Standards Authority
- Harvey Water
- F.I.T.S. (Forest Industry Training Services)
- Department of Fisheries
- Training and Accreditation Council
- WACoA (Other Ag Colleges)
- South West Education Region
- Department of Education
- South Regional TAFE
- Harvey Senior High School
- WesTrac
- Piacentini's
- HIA
- IAME
- Muresk

### **COMPLIANCE, GUIDANCE and ADVISORY BODIES**

College Board – Community, family and staff representation

Agricultural Advisory Committee– Agricultural industry representation

Trade Advisory Group – Trade industry representation

Trade Training Management Committee – Ag College and High School representation

## ENTRY REQUIREMENTS

The College is an Independent Public School, students choose to apply and acceptance is based on a selection process which aims to identify students who are committed to the style and ethos of the College and whose career aspirations can be advanced at the College.

Entry to the College is possible at either Year 10, 11 or 12, but most students tend to enter at Year 10 and exit after Year 12 having spent three years at the College.

Both boarding and day students are accepted into the College and all principles of social justice and equity are utilised in the selection process. Students older than 19 years on the day of enrolment will need to apply to the College to become full fee paying citizens and agree to abide by all College operating procedures.

**Secondary Students** usually complete Year 9 or 10 with reasonable levels of literacy and numeracy (Band 8 is suggested by the end of Year 10). Students provide school reports, references and other supporting evidence and an interview is conducted. An overall intake of approximately 64 students are selected in any one year.

## EDUCATION AND TRAINING GOALS

The WA College of Agriculture Harvey aims for every student to graduate with the following certifications and awards.

Western Australian Certificate of Education

AHC20122 Certificate II in Agriculture

Certificates from each of the four Trades area

- CPC10120 Certificate I in Construction
- AUR20720 Certificate II in Automotive Vocational Preparation
- MEM20422 Certificate II in Engineering Pathways
- MSF20522 Certificate II in Furniture Making Pathways

St John's Senior First Aid

White card (CPCCWHS1001 Prepare to Work Safely in Construction Industry)

Keys for Life

### Optional qualifications

AHC30122 Certificate III in Agriculture

AHC21416 Certificate II in Wool Handling

AHC21316 Certificate II in Shearing

AHC21216 Certificate II in Rural Operations

AHC33116 Certificate III in Advanced Wool Handling (via South Regional TAFE)

CPC20220 Certificate II in Construction Pathway

AUR20520 Certificate II in Automotive Servicing Technology

Selection of higher level units leading to Statements of Attainment in

- MEM20105 Certificate II in Engineering
- MSF20322 Certificate II in Furniture Making

## CONTRIBUTIONS, CHARGES AND FEES POLICY

College fees are set by the Finance Committee and endorsed by the Board and meet the policies and guidelines set by the Department of Education.

### ACCEPTANCE DEPOSIT

A deposit of \$200.00 is payable upon acceptance of an offer at the College and is credited to first term fees. The Acceptance Deposit is fully refunded in the event of a written withdrawal being received prior to the start of Term One.

### INTERNAL FEES:

Internal fees are outlined in the Contributions and Charges document and cover curriculum, training and associated costs. These are due and payable on the **first day of enrolment**. If a student leaves the College education program, these fees will be refunded on a pro-rata based on Department of Education guidelines and in part to reflect items as yet unspent (refer to details listed in Contribution and Charges).

### BOARDING FEES:

The first boarding fee instalment is due and payable on the first day of enrolment, with the second due on the first day of Term Two. **The first and second boarding fee instalments must be cleared by the end of Semester One for students to continue in the residence in Semester Two.**

The third boarding fee instalment is due and payable on the first day of Term Three. This instalment must be cleared **before** the commencement of Term Four.

Failure to clear all outstanding fees from Year 10 and 11 may result in residential status being denied **at** the commencement of the following year.

### Boarding Fees refund policy:

The boarding fees refund policy is determined by the Department of Education on a pro-rata basis.

### PAYMENT PLANS:

Payment plans can be arranged with the Manager of Corporate Services or Principal by parents wishing to pay by smaller instalments. In the absence of a formal agreed payment plan, there is an expectation that instalment deadlines are met.

## YEAR 10 PROGRAM

The Year 10 program combines elements of the Australian Curriculum (English, Maths, HASS, Science, Health and Physical Education) with training in agriculture and related trades aligning with certificate II qualifications (normally achieved by the end of Year 11).

Students in Year 10 study 1 day per week on Farm, 3 days on Class and 1 day per week in the Trades workshops.

The Year 10 program is set for all students and encompasses all Farm enterprise areas and all Trades industry areas over the course of the year.

## YEAR 11 PATHWAYS

In Year 11 students have the ability to select a pathway with some option for tailoring a program that suits their interests and ability.

### **Pathway 1 Extension (Vocational Education and Training).**

- Study ATAR level Mathematics Applications and General level courses in the class area leading to the Western Australian Certificate of Education (WACE)
- Must sit the external ATAR Mathematics state based exam at the end of Year 12.
- Study the Curtin Uni Ready program leading to an ATAR equivalence of 70 to gain university entrance.
- Work towards nationally recognised qualifications in the Farm and Trades areas. These qualifications will assist students to access employment and further training in the TAFE sector.
- Spend two and a half days in Class, one day on Farm, one day in Trades, and an additional half a day in Trades or Farm.
- Preferred and recommended minimum entry requirement is a 'Category 3' for all components of the OLNA.

### **Pathway 2 General (Vocational Education and Training)**

- Study General level courses in the class area leading to the Western Australian Certificate of Education (WACE).
- Gain nationally recognised qualifications on Farm and in the Trades area to align to employment, traineeships, apprenticeships and further training at TAFE.
- Spend two days in Class, one day in Trades and one day on Farm, plus an option of either one additional day on Farm or one additional day in Trades.

## YEAR 12 PATHWAYS

In Year 12 students have the ability to select a pathway with some option for tailoring a program that suits their interests and ability.

### **Pathway 1 Extension (Vocational Education and Training).**

- Study ATAR level Mathematics Applications and General level courses in the class area leading to the Western Australian Certificate of Education (WACE)
- Must sit the external ATAR Mathematics state based exam at the end of Year 12.
- Study the Curtin Uni Ready program leading to an ATAR equivalence of 70 to gain university entrance.

- Work towards nationally recognised qualifications in the Farm and Trades areas. These qualifications will assist students to access employment and further training in the TAFE sector.
- Spend two and a half days in Class, one day on Farm, one day in Trades, and an additional half a day in Trades or Farm.
- Preferred and recommended minimum entry requirement is a 'Category 3' for all components of the OLNA.

**Pathway 2    General (Vocational Education and Training)**

- Study General level courses in the class area leading to the Western Australian Certificate of Education (WACE).
- Use their nationally recognised qualifications gained on Farm and in the Trades area as well as their WACE to access employment, traineeships, apprenticeships and further training at TAFE.
- Spend two days in Class, one day in Trades and one day on Farm, plus an option of either one additional day on Farm or one additional day in Trades.

## YEAR 11 AND 12 PROGRAM

The following table shows the breakdown of Class, Trades and Farms days for each of the two pathways on offer in Year 11 and 12.

Location	Extension Pathway 1	General Pathway 2
<b>CLASS</b>	<b>2.5 Days</b> English/Mathematics/Plant Production Systems/ Animal Production Systems  Chemistry - Year 11 only  Uni Ready	<b>2 Days</b> English/Mathematics/Plant Production Systems/ Animal Production Systems  Accounting Finance - Year 11 only
<b>TRADES</b>	<b>1 or 1.5 Days</b> Yr 11 All Trade areas Yr 12 All Trade areas or may be able to select preferences, if timetable constraints allow for this to be accommodated.	<b>1 or 2 Days</b> Yr 11 All Trade areas Yr 12 All Trade areas
<b>FARM</b>	<b>1 or 1.5 Days</b> Yr 11 All Farm areas Yr 12 All Farm areas	<b>1 or 2 Days</b> Yr 11 All Farm areas Yr 12 All Farm areas

### Course options

Year 12 Students who have been at the college for at least 1 year may elect to drop a day of Trades or Farm and undertake a day of Structured Workplace Learning. To be eligible students must meet the following criteria:

- Completed Certificate II in Agriculture and VETPIA (to drop a day of farm)
- Completed 4 trade qualifications if you have been at the College for two years, or completed 2 trade qualifications if you have been at the College for one year (to drop a day of trades)

The following table illustrates the two pathways through the range of courses on offer in the Class area.

Year 10		Year 11	Year 12	ACHIEVEMENT
Australian Curriculum Maths, English, Science, HASS, Health & Physical Education College based curriculum Animals and Plants	<b>Extension</b>	Maths Applications Units 1&2  English General Units 1&2  Plant Production Systems General Unit 2  Animal Production Systems General Unit 2  Primary Industries (VET Industry specific) Units 1&2  Chemistry General Unit 1  Uni Ready Course (2 units)	Maths Applications Units 3&4  English General Unit 3&4  Plant Production Systems General Units 3&4  Animal Production Systems General Units 3&4  Primary Industries (VET Industry specific) Units 3&4  Uni Ready Course (2 units)	Alternate entry to university ATAR equivalent to 70  WACE= High School Graduation
	<b>General</b>	Maths Essential Units 1&2  English General Units 1&2  Plant Production Systems General Unit 2  Animal Production Systems General Unit 2  Primary Industries (VET Industry specific) Units 1&2  Accounting and Finance General Unit 1	Maths Essential Unit 3&4  English General Unit 3&4  Plant Production Systems General Units 3&4  Animal Production Systems General Units 3&4  Primary Industries (VET Industry specific) Units 3&4	WACE= High School Graduation
Students who are not likely to achieve Category 3 in the Online Literacy and Numeracy Assessment by the end of Year 12 will have an individual education plan developed.				

Outlines of all Courses can be found on the School Curriculum Assessment Standards Authority website at [http://www.scasa.wa.edu.au/internet/Senior\\_Secondary/Courses/Courses](http://www.scasa.wa.edu.au/internet/Senior_Secondary/Courses/Courses). Parents without internet connection are invited to contact the college to seek detail about specific course outlines.

## CLASS COURSES ON OFFER

### Year 10

#### Australian Curriculum

The areas of English, Mathematics, Science, Humanities and Social Sciences and Health and Physical Education are delivered as per the Australian Curriculum for Year 10.

#### Agriculture

##### Animals

In this unit, students learn about the types and features of animal enterprises and the selection of livestock to meet production goals. Students learn about animal life cycles, and stages of growth and development and how they influence production systems. They consider the nutritional and welfare needs of animals in different systems and recognise signs of ill health. Students use basic economic concepts associated with animal production to guide decision-making as well as investigate aspects of animal production. They learn about the safe, efficient and effective use of equipment and resources used in animal production.

The content should be based around one or more animal production enterprises.

##### Plants

In this unit, students learn about the basic structure and function of plants, plant processes and the types and features of plant enterprises. The teaching and learning is based around one or more plant enterprises. Students learn about the types of crops and plant pests common to Western Australia, as well as the safe, efficient and effective use of equipment and resources used in plant production. Students use basic economic concepts associated with plant production to guide decision-making and investigate aspects of plant production.

The content should be based around one or more plant production enterprises.

## ENGLISH

### 11General General Unit 1

Unit 1 focuses on students comprehending and responding to the ideas and information presented in texts. Students:

- employ a variety of strategies to assist comprehension
- read, view and listen to texts to connect, interpret and visualise ideas
- learn how to respond personally and logically to texts by questioning, using inferential reasoning and determining the importance of content and structure
- consider how organisational features of texts help the audience to understand the text
- learn to interact with others in a range of contexts, including everyday, community, social, further education, training and workplace contexts
- communicate ideas and information clearly and correctly in a range of contexts
- apply their understanding of language through the creation of texts for different purposes.

## **General Unit 2**

Unit 2 focuses on interpreting ideas and arguments in a range of texts and contexts.

Students:

- analyse text structures and language features and identify the ideas, arguments and values expressed
- consider the purposes and possible audiences of texts
- examine the connections between purpose and structure and how a text's meaning is influenced by the context in which it is created and received
- integrate relevant information and ideas from texts to develop their own interpretations
- learn to interact effectively in a range of contexts
- create texts using persuasive, visual and literary techniques to engage audiences in a range of modes and media.

## **12 General General Unit 3**

Unit 3 focuses on exploring different perspectives presented in a range of texts and contexts.

Students:

- explore attitudes, text structures and language features to understand a text's meaning and purpose
- examine relationships between context, purpose and audience in different language modes and types of texts, and their impact on meaning
- consider how perspectives and values are presented in texts to influence specific audiences
- develop and justify their own interpretations when responding to texts
- learn how to communicate logically, persuasively and imaginatively in different contexts, for different purposes, using a variety of types of texts.

## **General Unit 4**

Unit 4 focuses on community, local or global issues and ideas presented in texts and on developing students' reasoned responses to them.

Students:

- explore how ideas, attitudes and values are presented by synthesising information from a range of sources to develop independent perspectives
- analyse the ways in which authors influence and position audiences
- investigate differing perspectives and develop reasoned responses to these in a range of text forms for a variety of audiences
- construct and clearly express coherent, logical and sustained arguments and demonstrate an understanding of purpose, audience and context
- consider intended purpose and audience response when creating their own persuasive, analytical, imaginative, and interpretive texts.

# MATHEMATICS

## 11ATAR

**Mathematics Applications** is an ATAR course which focuses on the use of mathematics to solve problems in contexts that involve financial modelling, geometric and trigonometric analysis, graphical and network analysis, and growth and decay in sequences. It also provides opportunities for students to develop systematic strategies based on the statistical investigation process for answering questions that involve analysing univariate and bivariate data, including time series data.

### ATAR Unit 1

This unit has three topics: 'Consumer arithmetic', 'Algebra and matrices', and 'Shape and measurement'.

'Consumer arithmetic' reviews the concepts of rate and percentage change in the context of earning and managing money and provides a fertile ground for the use of spread sheets.

'Algebra and matrices' continues the Year 7–10 curriculum study of algebra and introduces the topic of matrices. The emphasis of this topic is the symbolic representation and manipulation of information from real-life contexts using algebra and matrices.

'Shape and measurement' builds on and extends the knowledge and skills students developed in the Year 7–10 curriculum with the concept of similarity and associated calculations involving simple geometric shapes. The emphasis in this topic is on applying these skills in a range of practical contexts, including those involving three-dimensional shapes.

Classroom access to the technology necessary to support the computational aspects of the topics in this unit is assumed.

### ATAR Unit 2

This unit has three topics: 'Univariate data analysis and the statistical process', 'Linear equations and their graphs', and 'Applications of trigonometry'.

'Univariate data analysis and the statistical process' develops students' ability to organise and summarise univariate data in the context of conducting a statistical investigation.

'Linear equations and their graphs' uses linear equations and straight-line graphs, as well as linear-piece-wise and step graphs to model and analyse practical situations.

'Applications of trigonometry' extends students' knowledge of trigonometry to solve practical problems involving non-right-angled triangles in both two and three dimensions, including problems involving the use of angles of elevation and depression and bearings in navigation.

Classroom access to the technology necessary to support the graphical, computational and statistical aspects of this unit is assumed.

## 12ATAR

### ATAR Unit 3

This unit has three topics: 'Bivariate data analysis', 'Growth and decay in sequences', and 'Graphs and networks'.

'Bivariate data analysis' introduces students to some methods for identifying, analysing and describing associations between pairs of variables, including the use of the least-squares method as a tool for modelling and analysing linear associations. The content is to be taught within the framework of the statistical investigation process.

'Growth and decay in sequences' employs recursion to generate sequences that can be used to model and investigate patterns of growth and decay in discrete situations. These sequences find application in a wide range of practical situations, including modelling the growth of a compound interest investment, the growth of a bacterial population, or the decrease in the value of a car over time. Sequences are also essential to understanding the patterns of growth and decay in loans and investments that are studied in detail in Unit 4.

'Graphs and networks' introduces students to the language of graphs and the ways in which graphs, represented as a collection of points and interconnecting lines, can be used to model and analyse everyday situations, such as a rail or social network.

Classroom access to technology to support the graphical and computational aspects of these topics is assumed.

#### **ATAR Unit 4**

This unit has three topics: 'Time series analysis', 'Loans, investments and annuities', and 'Networks and decision mathematics'.

'Time series analysis' continues students' study of statistics by introducing them to the concepts and techniques of time series analysis. The content is to be taught within the framework of the statistical investigation process.

'Loans investments and annuities' aims to provide students with sufficient knowledge of financial mathematics to solve practical problems associated with taking out or refinancing a mortgage and making investments.

'Networks and decision mathematics' uses networks to model and aid decision making in practical situations.

Classroom access to the technology necessary to support the graphical, computational and statistical aspects of this unit is assumed.

## **11General**

**Mathematics Essential** is a General course which focuses on using mathematics effectively, efficiently and critically to make informed decisions. It provides students with the mathematical knowledge, skills and understanding to solve problems in real contexts for a range of workplace, personal, further learning and community settings. This course provides the opportunity for students to prepare for post-school options of employment and further training.

### **General Unit 1**

This unit provides students with the mathematical skills and understanding to solve problems relating to calculations, applications of measurement, the use of formulas to find an unknown quantity and the interpretation of graphs. Throughout this unit, students use the mathematical thinking process. This process should be explicitly taught in conjunction with the unit content. Teachers are advised to apply the content of the four topics in this unit: Basic calculations, percentages and rates; Algebra; Measurement; and Graphs, in contexts which are meaningful and of interest to their students. Possible contexts for this unit are Earning and managing money and Nutrition and health.

It is assumed that an extensive range of technological applications and techniques will to be used in teaching this unit. The ability to choose when or when not to use some form of technology, and the ability to work flexibly with technology, are important skills.

The number formats for the unit are whole numbers, decimals, common fractions, common percentages, square and cubic numbers written with powers.

## **General Unit 2**

This unit provides students with the mathematical skills and understanding to solve problems related to representing and comparing data, percentages, rates and ratios and time and motion. Students further develop the use of the mathematical thinking process and apply the statistical investigation process. The statistical investigation process should be explicitly taught in conjunction with the statistical content within this unit. Teachers are advised to apply the content of the four topics in this unit: Representing and comparing data; Percentages; Rates and ratios; and Time and motion, in a context which is meaningful and of interest to their students. Possible contexts for this unit are Transport and Independent living.

It is assumed that students will be taught this course with an extensive range of technological applications and techniques. The ability to be able to choose when or when not to use some form of technology and to be able to work flexibly with technology are important skills.

The number formats for the unit are whole numbers, decimals, fractions and percentages, rates and ratios.

## **12 General General Unit 3**

This unit provides students with the mathematical skills and understanding to solve problems related to measurement, scales, plans and models, drawing and interpreting graphs and data collection. Students use the mathematical thinking process and apply the statistical investigation process. Teachers are encouraged to apply the content of the four topics in this unit: Measurement; Scales, plans and models; Graphs in practical situations; and Data collection, in a context which is meaningful and of interest to the students. A variety of approaches could be used to achieve this purpose. Possible contexts for this unit are Construction and design, and Medicine.

It is assumed that an extensive range of technological applications and techniques will be used in teaching this unit. The ability to choose when, and when not, to use some form of technology, and the ability to work flexibly with technology, are important skills.

The number formats for the unit are positive and negative numbers, decimals, fractions, percentages, rates, ratios, square and cubic numbers written with powers and square roots.

## **General Unit 4**

This unit provides students with the mathematical skills and understanding to solve problems related to probability, earth geometry and time zones, loans and compound interest. Students use the mathematical thinking process and apply the statistical investigation process to solve problems involving probability. Teachers are advised to apply the content of the three topics in this unit: Probability and relative frequencies; Earth geometry and time zones; and Loans and compound interest, in a context which is meaningful and of interest to the students. Possible contexts for this unit are Finance, and Travel.

It is assumed that an extensive range of technological applications and techniques will be used in teaching this unit. The ability to choose when, and when not, to use some form of technology, and the ability to work flexibly with technology, are important skills.

The number formats for the unit are positive and negative numbers, decimals, fractions, percentages, rates, ratios and numbers expressed with integer powers.

# ANIMAL PRODUCTION SYSTEMS

## 11 General

### General Unit 2

In this unit, students learn about animal physiological processes. They learn to match feed types and quantities according to animal requirements, and to adjust stocking rates according to feed availability. Students learn about natural resources used in agriculture and the importance of protecting natural ecosystems. They investigate pests in production systems and consider strategies to manage this challenge. Students will be involved in an investigation and will learn to identify the elements of valid experimental design. Students identify market specifications for animal products, develop a calendar of operations and calculate profit.

## 12 General

### General Unit 3

In this unit students learn about different digestive processes in livestock. They consider how feed rations change depending on physiological state. Students learn about the impacts of animal production on the natural environment, and stewardship of natural and farming resources. They learn about the value of domestic animal production, and marketing options. Students will be involved in an investigation and will learn to identify the elements of valid experimental design. Students apply breed selection criteria to produce to market requirements profitably.

### General Unit 4

In this unit students learn about reproductive processes, and breeding cycles in selected livestock. They learn to apply this knowledge to manage natural breeding programs. Students learn about the principles of genetics and the effect of interactions between genotype and environment and how this can influence animal breeding. They learn about monitoring and managing pest populations and identify risks to sustainable production. They learn how immunity develops from a scheduled vaccination program. They will learn about the relationship between feed on offer and stocking rates. Students learn about the factors affecting supply and demand for an animal product, and how to prepare budgets for an enterprise.

# PLANT PRODUCTION SYSTEMS

## **11 General General Unit 2**

In this unit students learn about plant production through the provision of an optimum growing environment. They identify market specifications for plant products, develop a calendar of operations and calculate profit.

Students learn about natural resources used in agriculture and the importance of protecting natural ecosystems. They interpret information concerning chemical use and how to comply with industry codes of practice. Students will be involved in an investigation and will learn to identify the elements of valid experimental design.

## **12 General General Unit 3**

In this unit students learn about plant anatomy, growth and development and how these contribute to the production of a marketable product. They learn about plant responses to different growing conditions as well as the impact of pests, including options to minimise negative effects and promote sustainability. Students examine the properties of different soil types and how these affect the plant's ability to access requirements for growth. Students learn about the impacts of plant production on the natural environment, and stewardship of natural and farming resources. They learn about the value of domestic plant production, and marketing options. Students will be involved in an investigation and will learn to identify the elements of valid experimental design.

## **General Unit 4**

In this unit students learn about the improvement of the immediate plant environment to optimise growth and development through all phases of plant growth. This includes fertiliser application and soil management techniques. Students learn about the principles of genetics and the effect of interactions between genotype and environment and how this can influence plant breeding. They learn about monitoring and managing pest populations and identify risks to sustainable production. Students learn about the role of quality assurance (QA) programs in plant production systems and how to prepare budgets for an enterprise.

## ACCOUNTING & FINANCE

### Year 11

#### General Unit 1

The focus for this unit is personal finance. The concepts, principles and terminology used in financial decision making and management on a personal basis are introduced. The unit addresses main institutions that operate in financial markets and how governments and other bodies can affect the way individuals and groups make financial decisions. The main financial documents and reports used in personal financial transactions and decision making and the systems that facilitate individuals to carry out their financial transactions are considered.

## CHEMISTRY

### 11 General

#### General Unit 1

In this unit, students build on informal understandings of chemistry that they have already acquired through using different materials, tools and products in their lives, and through everyday chemical reactions, such as cooking, decomposition and rusting.

Students develop their understandings through scientific inquiry. They plan and conduct investigations to collect first-hand data safely and methodically. They investigate factors that affect solubility and change of state as well as gathering data to investigate factors that affect the rates of chemical reactions.

## PRIMARY INDUSTRY VET INDUSTRY SPECIFIC

### Course content

A VET industry specific course includes a full, nationally recognised AQF qualification; mandatory industry related workplace learning and contributes towards the WACE as a WACE course instead of unit equivalence. The most current training packages are used in these courses and are updated regularly as new versions are endorsed.

The Certificate II in Agriculture completed in this course, results in the achievement of **FOUR** course units (two Year 11 units and two Year 12 units). Completion of **TWO** Authority-developed Workplace Learning endorsed program unit equivalents is compulsory to meet program requirements, and must be from industry related placement (farm practical)/employment relevant to the job outcome at this level. This is completed onsite at the College.

## WORKPLACE LEARNING (ADWPL)

### Year 11 & 12

The Workplace Learning endorsed program provides an opportunity for a student to demonstrate, and develop increasing competence in, the core skills for work, often referred to as generic, transferable or employability skills. A student learns to apply and adapt the workplace skills that are necessary to understand and carry out different types of work, and that play a key role in lifelong learning.

Developing competence in workplace skills assists an individual to gain employment, and in the longer term, to progress within the organisation or industry area in which they are employed, and to contribute successfully to the organisation's objectives and to the wider community.

# Uni Ready

## Year 11

### Core Units

#### **Fundamentals of Academic Writing PWRP0001**

Covers the basics of university level academic writing with a strong focus on academic integrity, referencing, and essay writing skills. Students will develop reading, writing and research skills while learning how to critically evaluate sources and reflect on their own academic experiences. Assessments are structured around the essay writing process from initial researching to draft and final polished argumentative essay.

#### **Foundations of Communication COMS002**

Students will explore the different types of communication they might experience at university, with a focus on working in groups and solving communication issues. Students will need to report on discussions, complete a group assessment, and an oral presentation to demonstrate their developing skills.

## Year 12

### Elective Units

#### **Chemistry Essentials 1 CHEM0006**

This unit will explore the following concepts in chemistry: atomic structure, periodic trends, and models of bonding, including intermolecular forces. The mole concept and fundamental stoichiometric principles essential to chemistry applications will also be introduced. An introduction to physical chemistry concepts and organics chemistry is also included.

#### **Introduction to Commerce MGMT0001**

This unit will provide an introduction to the fundamentals of economics, marketing, law, and accounting principles. The unit will focus on the basic concepts and techniques in accounting that apply to business; law with a business context; as well as giving attention to the basic principles relating to economics. It will explore the decisions made by individuals and groups, and the impact this had on wealth, income and everyday living. Students will be shown how to apply basic economic, marketing, legal and accounting concepts to practical solutions therefore shedding light on key commercial operations.

## QUALIFICATIONS ON OFFER

There are three elements to the courses offered.

1. Short courses which are of one or two days' duration and often certified by external sources.
2. State based School Curriculum and Standards Authority Courses which are accredited and used in determining entry to University and for High School Graduation.
3. National Recognised Training through the Training Accreditation Council, and certified according to the Australian Qualification Framework. These qualifications are recognised nationally and articulate with apprenticeships, traineeships and further training.

### 1. SHORT COURSES

A wide variety of short courses may be offered to students attending the WA College of Agriculture at Harvey, depending on the availability of trainers and student demand. Often, external providers are used to deliver specialist programs in one and two day blocks. Some of these are compulsory and some elective.

#### Nationally Recognised Training

- **Chemical Handling Competencies** certificated course delivered by accredited personnel to give participants knowledge on the safe use and disposal of chemicals used in the agricultural industry. Units achieved AHCCHM304 Prepare and Apply Chemicals, AHCCHM307 Transport, Handle and Store Chemicals.
- **First Aid Course** (compulsory) A two-day course. On successful completion, participants receive a Senior First Aid Certificate from St John's Ambulance. Unit achieved HLTAID003 Provide First Aid.
- **White Card - Occupational Health & Safety** (compulsory) A four-hour course delivered by college staff detailing information about worksafe, duty of care, hazard identification and reduction in the building industry. Unit achieved CPCCWHS1001 Prepare to Work Safely in Construction Industry.
- **Chainsaw Course** (Elective) A two-day course on servicing and using chainsaws for general use. Unit achieved AHCARB205A Operate and Maintain Chainsaws.
- **WA Recreational Skippers Ticket** (Department of Transport)

#### Other

- **FarmSafe** (compulsory) A course delivered by an accredited trainer on farm on entry to the college.
- **Artificial Insemination of cattle** (Provider - Herd Improvement Service of WA) (Elective) A two-day industry level course on the basics of artificial insemination in cattle.
- **Front-End Loader Use Course** (Elective) – Provided by College personnel for general use of front-end loaders – not industry accredited. Approximately one day.
- **Ram Judging** (Compulsory) – Utilising experts in the field providing sufficient knowledge for judging at major state events.
- **Heifer Selection** (Elective) – Delivered by College personnel for students interested in this area.
- **Shearer and Shedhand Training** - College organised with extensions provided for interested students.
- **Low Stress Cattle handling** (Elective) - Provided by external groups.
- **Keys for Life** – Compulsory for Year 10 to assist young drivers obtain the theory part of their WA drivers licence.

## **2. STATE QUALIFICATIONS – WEST AUSTRALIAN CURRICULUM West Australian Certificate of Education (WACE)**

Specific information can be obtained from the School Curriculum and Standards Authority website.

### **To QUALIFY FOR THE WACE, a student must:**

- Complete at least 20 semesterised course units.
  - At least twelve units must be from School Curriculum and Standards Authority (SCSA) developed courses
  - Up to eight unit equivalents may comprise SCSA endorsed programs or VET.
- Achieve 'C' grades or better
  - Across at least 14 course units if no SCSA endorsed programs or VET are included in the students' program, 6 of which must be studied in Year 12
  - SCSA endorsed programs or VET studied by the student reduces the number of C grades required.
- Meet the standard for English Language Competence
  - Complete at least four units of English with one pair of units studied in Year 12
  - Meet the language competence standard - Category 3 of the Online Literacy and Numeracy Assessment component.
- Select one pair of units from each of List A and List B course in Year 12.
- Achieve Category 3 in all Online Literacy and Numeracy Assessment components.
- Achieve an ATAR of at least 55 or a Certificate II qualification.

The Pathways on offer at the College are designed to enable achievement of WACE provided students perform at an appropriate level.

### **Endorsed Programs**

These programs carry credit towards the achievement of the WACE. They include several of the short courses on the previous page.

All students in Year 11 & 12 gain credit for the WACE Course Workplace Learning (ADWPL) through observation and competence whilst working on the farm enterprises and linking with Certificate II in Agriculture.

### 3. NATIONAL QUALIFICATIONS

The Australian Qualification Framework (AQF) established nationwide standards and nomenclature for the school's sector, the vocational education and training sector, and the higher education sector. In the vocational education and training sector, the AQF provides the following qualification levels:

Certificate I

Certificate II

Certificate III

Certificate IV

Diploma

Advanced Diploma (Then degree, post graduate qualifications etc)

The College delivers qualifications at Certificate I, II and III level.

Students completing Certificate II	Students Completing Certificate III
Demonstrate basic operational knowledge in a <i>moderate range</i> of areas	Demonstrate some relevant theoretical knowledge
Apply a defined range of skills	Apply a range of well-developed skills.
Apply known solutions to a limited range of predictable problems.	Apply known solutions to a variety of <i>predictable problems</i> .
Perform a range of tasks where choice between a limited range of options is required.	Perform processes that require a range of well-developed skills where some discretion and judgement is required
Access and record information from varied sources	Interpret available information using discretion and judgement.
Take limited responsibility for own outputs in work and learning.	Take responsibility for own outputs in work and learning.
	Take limited responsibility for the output of others.

#### AQF QUALIFICATIONS ON OFFER

WACA Harvey is a *Registered Training Organisation* (RTO number 50421). The qualifications delivered by the College are recognised Australia wide. Harvey provides courses from the following Training Packages leading to Certificate II in several industry areas and Certificate III in Agriculture. The College's registered scope of delivery is as follows.

Industry Area	Industry Sub Area	Code	Certificate Title
Metals & Engineering	Engineering	MEM10105 MEM20422 MEM20105	Certificate I in Engineering Certificate II in Engineering Pathways Certificate II in Engineering (statement of attainment only)
Construction, Plumbing and Services	Construction	CPC10120 CPC20220	Certificate I in Construction Certificate II in Construction Pathways
Furnishings	Furnishings	MSF10113 MSF20516 MSF20313 MSF10122 MSF20522 MSF20322	Certificate I in Furnishings (Teach out) Certificate II in Furniture Making Pathways (Teach out) Certificate II in Furniture Making (statement of attainment only) Certificate I in Furnishings Certificate II in Furniture Making Pathways Certificate II in Cabinet Making and Timber Technology (statement of attainment only)
Automotive	Service and Repair	AUR20720 AUR20520	Certificate II in Automotive Vocational Preparation Certificate II in Automotive Servicing Technology
Agriculture, Horticulture and Conservation and Land Management	Agriculture	AHC20116 AHC20122 AHC30116 AHC30122 AHC21216 AHC21416 AHC21316 AHC21320	Certificate II in Agriculture (Teach out) Certificate II in Agriculture Certificate III in Agriculture (Teach out) Certificate III in Agriculture Certificate II in Rural Operations Certificate II in Wool Handling Certificate II in Shearing Certificate II in Production Horticulture

## POST SECONDARY PATHWAYS

### **TAFE**

Every TAFE qualification has a set of minimum entry requirements which applicants must meet before an application will be considered. Generally, this will include points gained in relevant secondary subjects studied, minimum literacy requirements and appropriate work experience. TAFE applications are based on merit from a score derived using the above indicators. Information on the selection process for admission is available from the DTWD.

### **UNIVERSITY**

Students graduating from the College can enter University through an alternate entry pathway. Interested students are advised to contact the admissions office of individual universities for details of specific courses and entrance requirements.

Most universities offer alternate entry pathways for students into selected courses and these include Uni Ready courses, Principal's recommendations and portfolio entrance.

Universities in WA that are available for undergraduate courses are;

- Curtin University
- Murdoch University
- University of Western Australia
- Edith Cowan University

Muresk Institute provides tertiary options. Refer to their website for current offerings.

Many universities based in the Eastern states offer tertiary courses based on agriculture and agribusiness. Two of these are University of Queensland (Diploma of Agriculture) and Charles Sturt University (Bachelor of Agribusiness).

## TRADES QUALIFICATIONS ON OFFER

The Trades department at the College offers courses in four areas – Automotive, Engineering, Furnishing and Construction. These are practical courses made up of a series of units of competence. Students are given the opportunity to work with a vast range of resources in the relevant contexts.

Qualification delivery and assessment is programmed across 4 phases. The course is arranged in such a manner that a student could achieve a Certificate in each trade areas after 2 phases in that area.

It is anticipated that each phase of the program would take approximately one semester and that students would work through the phases in a sequential manner. The entry point and the number of years a student chooses a trades area is flexible and this will determine the progress through the course and the opportunity of achieving multiple qualifications.

### AUR20720 CERTIFICATE II IN AUTOMOTIVE VOCATIONAL PREPARATION

Certificates II in Automotive-Vocational Preparation is a practical courses made up of a series of units of competency. Students are given the opportunity to work with Automotive vehicles/equipment/machines in a range of contexts. All qualifications are part of the Automotive Training Package (AUR).

It is anticipated that a student would achieve Certificate II in Automotive Vocational Preparation after 2 phases. Each phase of the program would take approximately one semester and that students would work through the phases in a sequential manner. The entry point and the number of years a student chooses Automotive as an option will determine the progress through the course and the chances of achieving the full Certificate II.

To achieve Certificate II in Automotive-Vocational Preparation all competencies listed below must be achieved.

Code	Units of Competence	Core / Elective
AURAEA002	Follow environmental and sustainability best practice in an automotive workplace	Core
AURASA102	Follow safe working practices in an automotive workplace	Core
AURAF103	Communicate effectively in an automotive workplace	Core
AURAF104	Resolve routine problems in an automotive workplace	Core
AURTTK102	Use and maintain tools and equipment in an automotive workplace	Core
AURETR103	Identify automotive electrical systems and components	Core
AURLTA101	Identify automotive mechanical systems and components	Core
AURETR115	Inspect, test and service batteries	Elective
AURTTA002	Assist with automotive workplace activities	Elective
AURTTJ003	Remove and replace wheel and tyre assemblies	Elective
AURTTJ011	Balance wheels and tyres	Elective
AURTTE007	Dismantle and assemble single cylinder four-stroke petrol engines	Elective

**Minimum Entrance Requirement Nil**  
**Cost Approx \$130 - \$285 per phase.**

#### Further Study

Students choosing a career in the Automotive trades area may use some of these competencies towards further certificates.

## AUR20520 CERTIFICATE II IN AUTOMOTIVE SERVICING TECHNOLOGY

Certificates II in Automotive Servicing Technology is a practical courses made up of a series of units of competency. Students are given the opportunity to work with Automotive vehicles/equipment/machines in a range of contexts. All qualifications are part of the Automotive Training Package (AUR).

It is anticipated that a student would achieve Certificate II in Automotive Servicing Technology after 2 phases. Each phase of the program would take approximately one semester and that students would work through the phases in a sequential manner. The entry point and the number of years a student chooses Automotive as an option will determine the progress through the course and the chances of achieving the full certificate II.

To achieve Certificate II in Automotive Servicing Technology all competencies listed below must be achieved.

Code	Units of Competence	Core/Elective
AURAEA002	Follow environmental and sustainability best practice in an automotive workplace	Core
AURASA102	Follow safe working practices in an automotive workplace	Core
AURTTK102	Use and maintain tools and equipment in an automotive workplace	Core
AURTTE104	Inspect and service engines	Core
AURTTC001	Inspect and service cooling systems	Core
AURATA001	Identify basic automotive faults using troubleshooting process	Core
AURETR115	Inspect, test and service batteries	Core
AURTTA104	Carry out servicing operation	Core
AURTTD004	Inspect and service suspension systems	Core
AURTTD002	Inspect and service steering systems	Core
AURTTB101	Inspect and service braking systems	Core
AURTTQ001	Inspect and service final drive assemblies	Core
AURTTQ103	Inspect and service drive shafts	Core
AURAF103	Communicate effectively in an automotive workplace	Elective
AURAF104	Resolve routine problems in an automotive workplace	Elective
AURETK001	Identify, select and use low voltage electrical test equipment	Elective
AURTTJ011	Balance wheels and tyres	Elective
AURTTX002	Inspect and service manual transmissions	Elective
AURLTJ113	Remove, inspect and refit light vehicle wheel and tyre assemblies	Elective
AURTTF101	Inspect and service petrol fuel systems	Elective

**Minimum Entrance Requirement Nil**  
**Cost Approx \$130 - \$285 per phase.**

### Further Study

Students choosing a career in the Automotive trades area may use some of these competencies towards further certificates.

## MEM20422 CERTIFICATE II IN ENGINEERING PATHWAYS

Certificate II in Engineering Pathways is a practical course made up of a series of units. Students are given the opportunity to work with metal in a range of contexts. Certificate II in Engineering Pathways come from the Metals and Engineering National Training Package (MEM05).

To achieve Certificate II in Engineering Pathways all competencies listed below must be achieved.

Code	Units of Competence	Core/Elective
MEM13015	Work safely and effectively in manufacturing and engineering	Core
MEMPE005	Develop a career plan for the engineering and manufacturing industries	Core
MEMPE006	Undertake a basic engineering project	Core
MSMENV272	Participate in environmentally sustainable work practices	Core
MEM18002	Use power tools/hand held operations	Elective
MEM11011	Undertake manual handling	Elective
MEM16006	Organise and communicate information	Elective
MEM18001	Use hand tools	Elective
MEMPE001	Use engineering workshop machines	Elective
MEMPE002	Use electric welding machines	Elective
MEMPE003	Use oxy-acetylene and soldering equipment	Elective
MEMPE004	Use fabrication equipment	Elective

**Cost Approx \$254 - \$460 per phase plus additional for personal project materials.**

### **Further Study**

Students choosing a career in the Metals and Engineering area may use some of these competencies as entry level training to further certificates within the TAFE Metals Apprenticeship Program.

## MEM20105 CERTIFICATE II IN ENGINEERING (Statement of Attainment towards partial completion only)

The selection of units listed from Certificate II in Engineering provides a practical course. Students are given the opportunity to work with metal in a range of contexts. These units come from the Metals and Engineering National Training Package (MEM05).

The units of competence listed below will only form a Statement of Attainment towards partial completion of Certificate II in Engineering.

Code	Units of Competence	Core/Elective
MEM05012C	Perform Routine Manual Metal Arc Welding	Elective
MEM05049B	Perform routine gas tungsten arc welding	Elective
MEM05050B	Perform Routine Gas Metal Arc Welding	Elective

**Minimum Entrance Requirement Nil**

**Cost Approx \$254 - \$460 per phase plus additional for personal project materials.**

### **Further Study**

Students choosing a career in the Metals and Engineering area may use some of these competencies as entry level training to further certificates within the TAFE Metals Apprenticeship Program.

## MSF20522 CERTIFICATE II FURNITURE MAKING PATHWAYS

Certificate II in Furniture Making Pathways is a practical course made up of a series of units. Students are given the opportunity to work with a range of timber, manufactured boards and hardware in a range of contexts. Certificate II in Furniture Making Pathways is from the Furnishing Training Package (MSF) which is a training package for the furnishing industry.

To achieve Certificate II in Furniture Making Pathways all competencies listed below must be achieved.

Code	Units of Competence	Core/Elective
MSFFP2020	Undertake a basic furniture making project	Core
MSFFP2017	Develop a career plan for the furnishing industry	Core
MSFGN2001	Make measurements and calculations	Core
MSMENV272	Participate in environmentally sustainable work practices	Core
MSMPCI103	Demonstrate care and apply safe practices at work	Core
MSFFP2012	Join furnishing materials	Elective
MSFFM2013	Use furniture making sector hand and power tools	Elective
MSFFP2011	Use timber furnishing construction techniques	Elective
MSFFP2014	Use basic finishing techniques on timber surfaces	Elective
MSFFP2018	Source and review information about furnishing product materials	Elective
MSFGN2004	Produce simple scale drawings by hand	Elective
MSMSUP106	Work in a team	Elective

**Minimum Entrance Requirement Nil**

**Cost Approx \$243 - \$323 per phase plus additional for personal project materials**

**Further Study**

Certificate III in Furniture Making

**MSF20322 CERTIFICATE II in CABINET MAKING AND TIMBER TECHNOLOGY**  
**(Statement of Attainment towards partial completion only)**

The selection of units listed from Certificate II in Furniture Making provides a practical course. Students are given the opportunity to work with a range of timber, manufactured boards and hardware in a range of contexts. These units come from the Furnishing Training Package (MSF) which is a training package for the furnishing industry.

The units of competence listed below will only form a Statement of Attainment towards partial completion of Certificate II in Furniture Making.

Code	Units of Competence	Core/Elective
MSFFF2012	Prepare surfaces for finishing	Elective
MSFFM2016	Join solid timber	Elective
MSFFM2017	Hand make timber joints	Elective

**Minimum Entrance Requirement** Nil

**Cost** Approx \$243 - \$323 per phase plus additional for personal project materials

**Further Study**

Certificate III in Furniture Making

## CPC10120 CERTIFICATE I IN CONSTRUCTION

Certificate I in Construction is a practical course made up of a series of units. Students are given the opportunity to work with a range of building materials in a range of contexts. Certificate I in Construction and comes from the Construction, Plumbing and Services National Training Package (CPC) which is a training package for the Construction Industry.

To achieve Certificate I in Construction all competencies listed below must be achieved.

Code	Units of Competence	Core/Elective
CPCCWHS2001	Apply OHS requirements, policies and procedures in the construction industry	Core
CPCCWHS1001	Prepare to work safely in the construction industry	Core
CPCCOM1012	Work effectively and sustainably in the construction industry	Core
CPCCOM1013	Plan and organise work	Core
CPCCCM1011	Undertake basic estimation and costing	Core
CPCCCM2004	Handle construction materials	Core
CPCCCM2005	Use construction tools and equipment	Core
CPCCVE1011	Undertake a basic construction project	Core
CPCCOM1015	Carry out measurements and calculations	Elective
CPCCOM2001	Read and interpret plans and specifications	Elective
CPCCCM2006	Apply basic levelling procedures	Elective

**Minimum Entrance Requirement Nil**

**Cost Approx \$171 - \$318 per phase.**

**Further Study**

Students choosing a career in this area will use these competencies attained as entry level training to further certificates in the General Construction industry.

## CPC20220 CERTIFICATE II IN CONSTRUCTION PATHWAYS

Certificate II in Construction Pathways is a practical course made up of a series of units. Students are given the opportunity to work with a range of building materials in a range of contexts. Certificate II in Construction Pathways come from the Construction, Plumbing and Services National Training Package (CPC) which is a training package for the Construction Industry.

To achieve Certificate II in Construction Pathways all competencies listed below must be achieved.

Code	Units of Competence	Core/Elective
CPCCWHS2001	Apply OHS requirements	Core
CPCCOM1012	Work effectively and sustainably in the construction industry	Core
CPCCOM1013	Plan and organise work	Core
CPCCOM1015	Carry out measurements and calculations	Core
CPCCVE1011	Undertake a basic construction project	Core
CPCCBL2001	Handle and prepare bricklaying and blocklaying materials	Elective
CPCCBL2002	Use bricklaying and blocklaying tools and equipment	Elective
CPCCCM2004	Handle construction materials	Elective
CPCCCAM2006	Apply basic levelling procedures	Elective
CPCCCM1011	Undertake basic estimation and costing	Elective

**Minimum Entrance Requirement Nil**

**Cost Approx \$171 - \$318 per phase.**

### **Further Study**

Students choosing a career in this area will use these competencies attained as entry level training to further certificates in the General Construction industry.

## AGRICULTURE QUALIFICATIONS ON OFFER

The Farm section of the College has a range of qualifications on offer. These come from the Agricultural, Horticultural and Conservation and Land Management (AHC) training package. Students are given the opportunity to work with a range of machines, systems plants and animals in a range of contexts to cover the range of units that make up the various qualifications on scope.

Qualification delivery and assessment is programmed across a 2-3 year period whilst the students are at the College. Students commence their training with Certificate II in Agriculture. Students should complete the Certificate II in Agriculture after two years allowing the third year to gain Certificate III in Agriculture or other Certificate II qualifications on offer. There is opportunity for students to gain multiple qualifications.

Students will be counselled on progress and selection on an individual basis by the College's support network and monitored through the reporting process.

### AHC20122 CERTIFICATE II IN AGRICULTURE

To achieve Certificate II in Agriculture all competencies listed below must be achieved.

UNIT	Description	Core/Elective
AHCWHS202	Participate in work health and safety processes	Core
AHCWRK211	Participate in environmentally sustainable work practices	Core
AHCWRK212	Work effectively in the industry	Core
AHCWRK213	Participate in workplace communications	Core
AHCCHM201	Apply chemicals under supervision	Elective (A unit)
AHCDRY202	Milk livestock	Elective (B unit)
AHCLSK204	Carry out regular livestock observation	Elective (A unit)
AHCLSK205	Handle livestock using basic techniques	Elective (A unit)
AHCLSK210	Muster and move livestock	Elective (A unit)
AHCLSK211	Provide feed for livestock	Elective (A unit)
AHCLSK217	Apply animal welfare principles to handling and husbandry of livestock	Import
AHCMOM202	Operate tractors	Elective (A unit)
AHCMOM203	Operate basic machinery and equipment	Elective (A unit)
AHCMOM204	Undertake operational maintenance of machinery	Elective (A unit)
AHCMOM205	Operate vehicles	Elective (A unit)
AHCMOM207	Conduct FEL Loader Operations	Elective (A unit)

**Minimum Entrance Requirement Nil**

**Cost Approx \$42 - \$67 per phase.**

## AHC21216 CERTIFICATE II IN RURAL OPERATIONS

To achieve Certificate II in Rural Operations all competencies listed below must be achieved.

UNIT	Description	Core/Elective
AHCWHS201	Participate in work health and safety processes	Core
AHCWRK204	Work effectively in the industry	Core
AHCWRK209	Participate in environmentally sustainable work practices	Core
ACMHBR201	Check and treat horses	Elective
AHCINF201	Carry out basic electric fencing	Elective
ACMEQU206	Perform horse riding skills at walk, trot and canter	Elective
AHCHBR203	Provide daily care for horses	Elective
AHCMOM204	Undertake operational maintenance of machinery	Elective
AHCMOM207	Conduct FEL operations	Elective
AHCLSK204	Carry out regular livestock observation	Elective
AHCLSK205	Handle livestock using basic techniques	Elective
AHCLSK217	Apply animal welfare principles to handling and husbandry of livestock	Elective
AHCLSK218	Ride educated horses to carry out basic stock work	Elective
AHCWOL201	Pen sheep	Elective
AHCWOL203	Carry out wool pressing	Elective

**Minimum Entrance Requirement Nil**

**Cost Approx \$42 - \$67 per phase.**

## AHC21416 CERTIFICATE II IN WOOL HANDLING

To achieve Certificate II in Wool Handling all competencies listed below must be achieved.

UNIT	Description	Core/elective
AHCLSK217	Apply animal welfare principles to handling and husbandry of livestock	Core
AHCSHG202	Assist in Preparing for Shearing & Crutching	Core
AHCWHS201	Participate in work health and safety processes	Core
AHCWOL201	Pen sheep	Core
AHCWOL202	Perform Board Duties	Core
AHCWOL203	Carry out wool pressing	Core
AHCWRK202	Observe environmental work practices	Core
AHCWRK204	Work effectively in the industry	Core

**Minimum Entrance Requirement Nil**

**Cost Approx \$42 - \$67 per phase.**

## AHC21316 CERTIFICATE II IN SHEARING

To achieve Certificate II in Shearing all competencies listed below must be achieved.

UNIT	Description	Core/Elective
AHCLSK217	Apply animal welfare principles to handling and husbandry of livestock	Core
AHCSHG201	Crutch sheep	Core
AHCSHG203	Shear sheep to novice level	Core
AHCSHG205	Grind combs and cutters for machine shearing	Core
AHCSHG206	Prepare hand piece and down tube for machine shearing	Core
AHCSHG210	Undertake basic shearing and crutching	Core
AHCWHS201	Participate in work health and safety processes	Core
AHCWRK204	Work effectively in the industry	Core
AHCWRK209	Participate in environmentally sustainable work practices	Core

**Minimum Entrance Requirement Nil**

**Cost Approx \$42 - \$67 per phase.**

## AHC30122 CERTIFICATE III IN AGRICULTURE

To achieve Certificate III in Agriculture all competencies listed below must be achieved.

UNIT	Description	Core/Elective
<b>AHCWHS302</b>	Contribute to Work Health and Safety Processes	Core
<b>AHCWRK320</b>	Apply Environmentally Sustainable Work Practices	Core
<b>AHCLSK309</b>	Implement Animal Health Control Programs	Elective (A unit)
<b>AHCCHM304</b>	Transport and Store Chemicals	Elective (A unit)
<b>AHCCHM307</b>	Prepare and Apply Chemicals to Control Pests, Weeds and Diseases	Elective (A unit)
<b>AHCLSK301</b>	Administer Medication to Livestock	Elective (A unit)
<b>AHCLSK311</b>	Implement Feeding Plans for Livestock	Elective (A unit)
<b>AHCMOM304</b>	Operate Machinery and Equipment	Elective (A unit)
<b>AHCPMG301</b>	Control Weeds	Elective (A unit)
<b>AHCPMG302</b>	Control plant pests, diseases and disorders	Elective (A unit)
<b>AHCLSK308</b>	Identify and Draft Livestock	Elective (A unit)
<b>AHCLSK318</b>	Rear newborn and young livestock	Elective (A unit)
<b>AHCLSK331</b>	Comply with industry animal welfare requirements	Elective (A unit)
<b>AHCMOM202</b>	Operate tractors	Elective (B unit)
<b>AHCINF206</b>	Install, maintain and repair farm fencing	Import
<b>AHCLSK206</b>	Identify and Mark Livestock	Import

**Minimum Entrance Requirement** – Nil, however the structure of the program at the College requires students to complete the Certificate II in Agriculture prior to commencing this qualification.

**Cost Approx \$260**

## AHC20320 CERTIFICATE II in PRODUCTION HORTICULTURE

To achieve Certificate III in Agriculture all competencies listed below must be achieved.

UNIT	Description	Core/Elective
AHCWHS201	Participate in work health and safety processes	Core
ore	Environmentally sustainable work practices	Core
AHCWRK204	Work effectively in the industry	Core
AHCWRK205	Participate in workplace communications	Elective
AHCCHM201	Apply chemicals under supervision	Elective
AHCMOM202	Operate tractors	Elective
AHCMOM203	Operate basic machinery and equipment	Elective
AHCMOM205	Operate vehicles	Elective
AHCPHT216	Carry out canopy maintenance	Elective
AHCPHT214	Support horticultural crop harvesting	Elective
AHCSOL203	Assist with soil or growing media sampling test	Elective
AHCPHT215	Plant horticultural crops	Elective
AHCPHT218	Carry out post-harvest operations	Elective
AHCPHT217	Undertake field budding and grafting	Elective
AHCNSY206	Care for nursery plants	Elective
AHCNSY207	Undertake Propagation Activities	Elective
AHCNSY205	Pot up Plant	Elective
AHCBIO204	Follow site biosecurity processes	Elective

**Minimum Entrance Requirement Nil**

**Cost Approx \$42 - \$67 per phase.**

## RECOGNITION OF PRIOR LEARNING (RPL)

The recognition of prior learning (RPL) is a process that enables a person to have competencies developed through formal learning, non-formal learning, informal learning and experience to be assessed and certificated by an RTO. An important outcome of a competency-based system is that any person who can demonstrate the requirements of a unit of competency to the level of rigour required by the *Standards for Registered Training Organisations (RTOs) 2015* (Standards for RTOs) can be awarded that unit of competency (unit) without undertaking a training program.

RPL is a formal assessment process where all unit requirements are addressed, and the judgement is made using evidence that meets all the rules of evidence.

Students applying for RPL need to follow the steps detailed in the College's RPL information and application package which includes presenting evidence of past learning which supports the student's claim that they possess the vocational competence and can be assessed.

### To Apply for RPL

- Prepare your supporting documents (evidence).
- Complete **Application for Recognition of Prior Learning (RPL)**.
- Submit your **Application for Recognition of Prior Learning (RPL)** and supporting documentation to the College Principal. All documentation will be forwarded to an Assessor in the course in which you are enrolled.

Following assessment of your application and possible interview you will be officially notified of the outcome of your RPL Application. **If your application is successful** – the result will be recorded on your Statement of Academic Record. If you have received recognition for a unit from a Training Package qualification you will also receive a Statement of Attainment.

**If your application is not successful** – but you feel that you did demonstrate competency you are entitled to appeal. Further information on the appeal process and an **Application for Appeal Form** is available from the College Principal. You must appeal within four weeks of receiving formal notification of the Skills Recognition assessment outcome. You will be notified of the results of your appeal within fifteen working days of your **Application for Appeal Form**.

### How Can I Improve My Chances of Getting My Skills Recognised Now & in the Future

Be aware of the different ways in which skills can be recognised as outlined in this package. Keep all documentation of courses that you have done, even those that have not been completed. Keep documentation of your work experience (ie: the dates when you worked, the name of the employer, the type of work that you did) and any other evidence to demonstrate the skills that you have gained. Ask WA College of Agriculture Harvey to allow you to undergo RPL, if you think you already have some of the skills for a qualification.

### What If I Need Help or Advice

If you are not sure whether or not you should apply or you have other queries about units of competency or modules contact the College Principal. If you need support and guidance to compile your documentation contact your Training Officer or Teacher.

## MUTUAL RECOGNITION

As a Registered Training Organisation, the WA College of Agriculture Harvey is obliged to recognise Statements of Attainment and Qualifications issued by other RTOs. Such qualifications can be used in fulfilment of the requirements for qualifications delivered at the college provided the specific Units of Competence are relevant and able to be transferred according to the rules of the particular Training Package.

Students with valid Statements of Attainment or Qualifications are to alert the college administration to their existence and provide original copies for analysis. Provided the qualifications are relevant and applicable under the rules of the particular Training Package, students will be given credit transfer for any Units of Competence they may already have been deemed competent in.

Staff at the college must recognize existing qualifications deemed relevant under the above process to be used for credit transfer for courses and qualifications on offer at the college.

## WORK EXPERIENCE

Work Experience provides an invaluable opportunity for students to learn and develop some of the many skills they need for employment. There are many benefits to students:

- Develop work readiness skills- communication, work ethic, teamwork etc
- Opportunity to explore possible career pathways.
- Develop networks with industry

Opportunities are available in each year group as follows:

### Year 10

- Week 9 Term 4 (compulsory) - school managed
- Week 10 Term 4 (optional) - school managed
- School Holiday breaks – private arrangement

### Year 11

- School Holiday breaks – private arrangement

### Year 12

Students who have been at the college for at least 1 year may elect to drop a day of Trades or Farm and undertake a day of Structured Workplace Learning. To be eligible students must meet the following criteria:

- Completed Certificate II in Agriculture and VETPIA (to drop a day of farm)
- Completed 4 trade qualifications if you have been at the College for two years, or completed 2 trade qualifications if you have been at the College for one year (to drop a day of trades)

In addition, students are encouraged to undertake work experience as a private arrangement during school holiday breaks.

Students undertaking off site work programs without College authorisation are not covered by the employment indemnity insurance of the Department of Education WA.

## REPORTING

Students attending the College will receive an interim report at the completion of first term (and third term for Trades subjects), a semester report at the conclusion of first semester and an end of year report at the conclusion to the year. Parent teacher interview sessions are held twice each year coinciding with reporting periods.

Most learning is assessed using the Course of Study based assessment method for state based subjects, or through competencies for the National Training Package Certificates under the Australian Qualifications Framework.

Reports are provided for each learning area a student undertakes and outline the student's progress for that reporting period. The Report includes a teacher's comment, a final or predicted grade where appropriate and feedback in relation to the child's attitude, behaviour and effort.

### **Grading Procedure- Class subjects**

Students are ranked on the basis of assessment tasks completed and then grade related descriptors used to allocate grades. Semester 1 reports will record a final grade for all subjects completed during the semester but a predicted grade will be suggested for year long subjects. Depending on student effort and application, these predicted grades may alter at the end of year reporting session.

A Statement of Results will be issued at the end of year 11 and 12 when grades are submitted to the Schools Standards Assessment and Curriculum Authority.

### **Training Packages**

Each industry area has a training package to identify the skills required in their particular field.

Students complete units of competence towards a skill set or qualification. They must demonstrate competence in all the elements of each competency as required by the respective training package. This usually takes place over a period of time.

The Academic Record issued at the end of Year 12 or when a student leaves the College only records completed competencies. Certification of a full qualification can take place when the packaging rules have been met for the respective qualification. A Record of Achievement and Certificate is issued when the student completes the full qualification.

A Statement of Attainment is issued for incomplete qualifications.

## SUBJECT SELECTIONS AND COURSE COUNSELLING

The following outlines the process:

- Subject selections and course counselling are undertaken during term 3 & 4 each year.
- Students already enrolled at the college commence the process at school in class group sessions with the Vice Principal, completing their self-reflection and preferences.
- The completed forms are then provided to parents/guardians to review and discuss with their child. Once finalised the signed forms are returned to the college.
- New students and parents/guardians to the college are provided with a copy of the selection form to complete along with supporting documentation to make their child's selections. The completed and signed forms are returned to the college.
- An online parent information session is provided live, with a recording made available to those unable to join the live presentation.
- A one on one counselling process may be used to review student performance to assist in identifying suitable pathways for successive years. These can be arranged in consultation with the Vice Principal.

Student selections are reviewed and allocations made according to their preferences. Please be aware not all preferences may be able to be accommodated given limitation of class sizes and the constraints and demands of the timetable.

## FEEDBACK AND APPEALS POLICY

The College will ensure that candidates are provided with feedback which should include the assessment outcome, recommendations for further training and appeals and re-assessment options.

The College has an appeals policy in place which allows candidates to challenge the assessment decision and enables them to be re-assessed. The grounds for an appeal are:

- The judgement as to whether competency has been achieved and demonstrated was made incorrectly and/or
- The judgement was not made in accordance with the assessment plan

APPEALS POLICY – Competency Based Assessment:

Applications for appeal must be made within 7 days of the assessment outcome being known in writing to the Line Manager with supporting grounds of appeal.

The outcome of the appeal will be made in writing to the candidate and either the original judgement stands, or a re-assessment will be arranged. This may occur with the original assessor, or an independently appointed one.

In the event that the Appellant is still dissatisfied with the appeal outcome, or if no response to their initial appeal has been received, the Appellant should register an appeal with the relevant State or Territory Training Authority. In Western Australia, this is the Training Accreditation Council (TAC)

APPEALS POLICY - School Curriculum and Standards Authority Based Assessment.

Please refer to the Assessment section in the College Handbook and SCASA Guidelines for appeals against grades awarded for WACE subjects. See Head of Department -Class

## **CHANGING COURSES**

Students entering the College in Year 11 or 12 will select and commence their course from the start of the year.

Changes of Course Applications are available from the Vice Principal.

Minimum times to achieve semester based Courses of Study are set by the School Curriculum and Standards Authority and final dates set to change courses will be adhered to.

Before a change in course can occur, signatures must be received from the parent, the student, the Business Manager (for alteration to fees), Farm Manager and Teacher in Charge of Trades, which is then forwarded to the Vice Principal for academic course changes and form group movement.
